STOP EXECUTIONS NOW!

AMNESTY
INTERNATIONAL

Your Majesty,

Your country continues to make prolific use of the death penalty. Saudi Arabia's largely secret and summary criminal justice system and its discriminatory use of the death penalty against vulnerable and disadvantaged members of society defy international standards and trends on the death penalty.

I urge your government to:

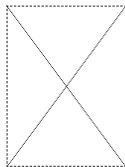

- commute the death sentence against Sheikh Mastan and his co-defendant Hamza Abu Bakir as well as all others on death row;
- ensure that the prisoners are given full and immediate access to legal representation, consular assistance, adequate translation facilities and medical assistance if necessary;
- declare a moratorium on executions and take immediate steps to bring the country's legal and judicial practices into line with international standards.

Yours sincerely,
